

**CAPSULE SUMMARY****CT-278****Samuel J. Hammett House****4900 Sixes Road****Prince Frederick, Calvert County****1880-1881****Private**

Built in 1880-1881 as a one-and-a-half-story dwelling, the primary resource at 4900 Sixes Road is an excellent example of the expansion of a modest rural building form in the latter 19th century and during the 20th century. The evolution of the structure reflects not only the needs of the property owner, the growth of the rural crossroads community of Bowens, but the architectural fashions of the renovation phases. The land on which the dwelling was constructed was originally part of a 750-acre tract of land owned by Cephas H. Bowen, whose daughter Rosa, married Samuel J. Hammett. The property at 4900 Sixes Road was given to the couple and construction of the one-and-a-half-story dwelling commenced in 1880-1881 along with such agricultural improvements as a barn and outbuildings associated with the cultivation of tobacco, corn, wheat, and vegetables. Samuel Hammett was a farmer, waterman, slave owner, and self-taught veterinarian and physician for the growing community. Accordingly, the property at one time included a smokehouse, corn crib, outhouse, chicken house, tobacco barn with stable, tenant house (originally slave quarters and destroyed by hurricane), hog pen, mill, Hammett's medical office, and one-room schoolhouse (the latter two were destroyed by fire). The property remained in the Hammett family for over 100 years, which it was purchased by the Handel family in 1953.

As originally constructed in 1880-1881, the wood-frame structure stood one-and-a-half stories in height. This original dwelling, ultimately raised to two stories with a side-gabled roof and exterior-end chimney, now serves as a rear ell to the 1882 portion of the building. This second building campaign, undertaken immediately after the original section was completed, is two stories in height with a side-gabled roof and exterior-end chimney. In 1920, the main block of the house as it appears today was constructed. The 1882 addition was utilized as a south wing. The main block stands two-and-a-half stories in height with a gable/hipped roof, dormers, and central chimney. In 1972, a one-and-a-half-story rear addition was constructed on the 1920 main block. Now covered by a shed roof, the 1972 addition was enlarged to two stories in 1985. The front porch was constructed circa 1976.

## 7. Description

Inventory No. CT-278

### Condition

<input type="checkbox"/> excellent	<input type="checkbox"/> deteriorated
<input type="checkbox"/> good	<input type="checkbox"/> ruins
<input type="checkbox"/> fair	<input checked="" type="checkbox"/> altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

**SETTING.** Located at 4900 Sixes Road, the dwelling sits on a sloping, grassy lot augmented with mature trees and shrubs, historic landscaping, foundation plantings and a gravel driveway. The rural property is further improved with an historic barn and shed and a non-historic pool, garage, and two sheds.

**PRIMARY RESOURCE.** As originally constructed in 1880-1881, the wood-frame structure stood one-and-a-half stories in height. This originally dwelling, ultimately raised to two stories with a side-gabled roof and exterior-end chimney, now serves as a rear ell to the 1882 portion of the building. This second building campaign, undertaken immediately after the original section was completed, is two stories in height with a side-gabled roof and exterior-end chimney. In 1920, the main block of the house as it appears today was constructed. The 1882 addition was utilized as a south wing. The main block stands two-and-a-half stories in height with a gable/hipped roof, dormers, and central chimney. In 1972, a one-and-a-half-story rear addition was constructed on the 1920 main block. Now covered by a shed roof, the 1972 addition was enlarged to two stories in 1985. The front porch was constructed circa 1976.

Presently, the two-and-a-half-story wood-frame main block of the dwelling, which is clad in aluminum siding, features a gable/hipped roof with pressed metal shingles, overhanging eaves, and a boxed aluminum cornice. A half-hipped dormer marks each elevation, each detailed with a lancet-arched 2/2 wood window with a square-edged aluminum surround. A central-interior, brick chimney rises from the center of the roof of the main block. The primary elevation, which faces east, consists of a two-bay main block with circa 1976 front porch and the 1882 two-story side addition. The symmetrically fenestrated main block features an off-center, single-leaf entry sheltered by the circa 1976 gabled portico with wood-post supports. The main block and two-story side addition are pierced on the façade with 2/2 wood windows with square-edged aluminum surrounds and fixed aluminum louvered shutters. The side and rear elevations of the two-story addition have 6/6 windows. An interior-end chimney and an exterior-end chimney anchor the two-story addition. On the north elevation of the two-story 1882 addition is the original 1880-1881 structure. Constructed of wood frame, the structure was ultimately raised to two stories and now has a side-gabled roof, exterior-end chimney, and 6/6 windows. A modern two-story shed addition, pierced with 6/6 vinyl windows, extends from the rear elevation of the main block. This addition includes the 1972 kitchen that was enlarged in 1985 to two stories. It has large plate-glass windows flanked by elongated 6/6 windows on both the first and second stories.

### SECONDARY RESOURCES.

A one-story circa 1990 garage/workshop features concrete block construction and a side-gabled corrugated metal roof with plywood-clad gable peaks.

Constructed circa 1880, the wood-frame tobacco barn stands two stories in height. Clad in vertical board, the barn features a gable-on-hip roof with corrugated metal sheathing.

A circa 1990 one-story shed features a wood frame with pressed vertical-board cladding and a front-gabled corrugated metal roof.

A circa 1980 one-story garage/shed features wood-frame construction, a side-gabled roof, and corrugated metal cladding. Underneath this structure is an ice house.

Constructed circa 1930, the wood-frame, one-story shed features weatherboard cladding and a front-gabled roof with asphalt shingles. This structure was originally a smokehouse.

An in-ground pool was added to the property circa 1990.

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance reports, complete evaluation on a DOE Form - see manual.)

Built in 1880-1881 as a one-and-a-half-story dwelling, the primary resource at 4900 Sixes Road is an excellent example of the expansion of a modest rural building form in the latter 19th century and during the 20th century. The evolution of the structure reflects not only the needs of the property owner, the growth of the rural crossroads community of Bowens, but the architectural fashions of the renovation phases.

The land on which the dwelling was constructed was originally part of a 750-acre tract of land owned by Cephas H. Bowen, whose daughter Rosa, married Samuel J. Hammett. The property at 4900 Sixes Road was given to the couple and constructed of the one-and-a-half-story dwelling commenced in 1880-1881 along with such agricultural improvements as a barn and outbuildings associated with the cultivation of tobacco, corn, wheat, and vegetables. Samuel Hammett was a farmer, waterman, slaveowner, and self-taught veterinarian and physician for the growing community. Accordingly, the property at one time included a smokehouse, corn crib, outhouse, chicken house, tobacco barn with stable, tenant house (originally slave quarters and destroyed by hurricane), hog pen, mill, Hammett's medical office, and one-room schoolhouse (the latter two were destroyed by fire). The property remained in the Hammett family for over 100 years, which it was purchased by the Handel family in 1953.(1)

Throughout most of its history until the second half of the 20th century, Calvert County was a highly rural, agricultural county engaged primarily in tobacco cultivation and characterized by an isolated, highly dispersed population. At the time of the 1890 federal census, Calvert County was the smallest county in the state of Maryland both in land area and population, but fifth in annual tobacco production behind a number of significantly larger, wealthier and more populous counties. Just ten years later in 1900, Calvert County had more than doubled its tobacco production and had risen to the third largest tobacco producing county in the state behind nearby Charles and Prince George's Counties.

The house is one of the most architecturally significant residences in Bowens, which, like other similar communities in Calvert County, developed during the late 19th century around heavily traveled crossroads. Since the 17th century until the second quarter of the 20th century, the major method of transportation in Calvert County had been the numerous navigable waterways. By the middle of the 19th century, a number of small crossroads communities had begun to develop throughout Calvert County, spurred by the increase in travel volume along inland routes due to the high tobacco yield during the prosperous decades before the Civil War. One such community developed on the road from Prince Frederick to Williams Wharf at the mouth of Battle Creek, where the road intersected with what is now Sandy Point Road. This road ran through the property of the Bowen family. This community, which would come to be known as Bowens, expanded south along Adelina Road to the intersection of what is now Sixes Road, which led from the middle of the county to Hallowing Point Wharf. In 1882, the community received a major stimulus with the purchase of a two-and-a-half-acre parcel at the northwest corner of Adelina and Sixes Roads by Silas Bowen, who constructed a store on the site. (2) By 1900, a post office was operating in Bowen's Store, which served as the anchor for the surrounding community until the middle of the 20th century. (3) With the establishment of a successful store and post office in Bowens, other residences were

SPECIFIC DATES	BUILDER/ARCHITECT
STATEMENT OF SIGNIFICANCE	

Behind Dr. Simmons office, or west of it, the Hammett house still stands. Although the interior is much altered the exterior retains a good resemblance of its Nineteenth Century appearance. 1950's snapshots show a small frame farmhouse with many additions of different sizes rambling in several directions at once. Gothic scrollwork on the multi-sided porched, spindle doors, 2/2 windows, bracketed eaves, and dormers with pointed-arch windows speak of the Victorian era. It is a house that grew with its family and for this reason it has much in common with the house and store across the street. It is a mid-nineteenth century structure which documents successive periods including our present day devotion to aluminum siding. This is not our first encounter with sheet metal decoration, however, and the Hammett House and Bowens Store prove it. The interior of the north wing on the store and the hall and one bedroom of this house are covered with sheets of tin pressed or embossed into a delightful floral pattern. Ogee mouldings and bulls eye corner blocks complete the ornate appearance of the interior.
